🚀 BUILDERS BOOTCAMP: FULLSTACK + Gen AI

From Beginner to Real-World Developer in 70 Days 💼

🎯 Course Overview

This is a **2.5 Months (70–75 Days) intensive program** designed to make you an **interview-ready intermediate fullstack developer** with real-world skills.

This is NOT a theory-based course.

This is a **practical, execution-focused, career-building program**.

You will:

- Build real-world projects
- Master multiple modern tech stacks
- Learn AI tools for faster development
- Build a strong portfolio (GitHub + LinkedIn)
- Become confident for interviews

📅 Course Details

- 📅 **Duration:** 70–75 Days (2.5 Months)
- 🚀 **Start Date:** 13–14 April
- 💻 **Mode:** Online
- 💸 **Price:** ₹1299 (Limited Offer)

🧠 Complete Curriculum

🌐 Frontend Foundations

- HTML5 (Structure, SEO basics)
- CSS3 (Flexbox, Grid, Responsive Design)
- JavaScript (Core + ES6+ + DOM mastery)

⚛️ React Development

- Components & Hooks
- State Management
- API Integration
- Scalable architecture

⚙️ JavaScript Backend

- Node.js
- Express.js
- REST APIs
- Authentication basics

🗄️ Databases

- MongoDB (NoSQL + Mongoose)
- MySQL (Relational DB)
- Database design for real apps

🐍 Python Backend

- FastAPI (Modern API development)
- Django (Full-scale backend for large apps)

☁️ Backend as a Service

- Firebase basics
- Supabase basics

🤖 Generative AI & AI Integration

- Introduction to Generative AI
- Using AI APIs in projects

- Building AI-powered features

🚀 AI Tools Mastery (Developer Productivity Boost)

Learn how to use AI like a **10x developer**:

- ChatGPT → Coding, debugging, explanations
- Claude → Deep reasoning & long code help
- Antigravity → Faster development workflows

⚡ What You'll Learn:

- Prompt engineering for developers
- Debugging code using AI
- Building UI faster with AI
- Writing better logic & APIs
- Using AI for project building

🎨 UI/UX Using AI

- Generate UI ideas using AI
- Convert ideas → real UI quickly
- Improve design thinking
- Build clean, modern interfaces fast

> Learn how to design like a developer, not just code.

🔧 Developer Tools & Career Skills

👩‍💻 Git & GitHub Mastery

- Version control fundamentals
- Git workflows (push, pull, branches)
- Open-source contributions
- Building a strong GitHub portfolio

🌐 Social Presence Building

- LinkedIn profile optimization
- GitHub profile enhancement
- Personal branding for developers

📄 Resume & Interview Preparation

- ATS-friendly resume building
- Project-based resume
- Interview guidance & preparation

🛠️ Projects & Execution Plan

🔥 Module-wise Fullstack Projects

You will build **real projects after each module**:

- ✅ HTML + CSS + JS → 1 Project
- ✅ React → 1 Project
- ✅ MERN Stack → 1 Fullstack Project
- ✅ Python Backend (FastAPI/Django) → 1 Fullstack Project

⚡ Mini Projects

- 10+ Mini Projects
- Cover all concepts step-by-step

📅 Practice System (Core Strength)

📝 Daily Tasks

- Daily coding assignments
- Concept-based practice
- Build discipline

📦 Weekly Project Assignments

- Real-world mini builds
- Strengthen logic & skills

🥇 Weekly Competitions

- Compete with peers
- Improve speed & creativity

🌍 Open Source Hackathon

- 1 Hackathon with Prize Pool 💰
- Real collaboration experience
- Boost GitHub profile

🎯 Final Outcome

By the end of this program, you will:

- ✅ Become **interview-ready developer**
- ✅ Build multiple **real-world projects**
- ✅ Have strong **GitHub + LinkedIn profile**
- ✅ Create an impressive **resume**
- ✅ Gain real development confidence
- ✅ Be ready for jobs & internships

👨‍💻 Who Should Join?

- Students with basic coding knowledge
- Beginners aiming for developer roles
- Aspiring fullstack developers
- Anyone serious about building real skills

🚀 Why This Program?

- 100% Practical (No boring theory)
- AI-powered development approach
- Multiple tech stacks in one program
- Real projects + competitions
- Career-focused training
- Affordable pricing

💸 Pricing

🔥 ₹1299 Only (Limited Seats)

> High-value skills at a minimal cost.

📩 Enrollment Details

- Limited seats for quality learning
- First come, first serve

🔥 Final Message

If you want to:

- Build real projects
- Learn modern tech + AI
- Become interview-ready
- Stand out from the crowd

👉 This program is for you.
